

Lab19 Technical Consulting

Providing Computer, Server, and Network Support

*Our business is technology,
so yours doesn't have to be.*

Lab19 is a computer and network consulting company, concentrating on the needs of organizations with small networks from two to twenty servers with less than 200 users.

As a smaller business you may not have the resources or the need to hire on a full time Network Administrator or IT Director, that's where we can help. We can offer you system monitoring, blocks of time, project support, or break/fix support, whatever you prefer.

Whether it's a new office setup or ongoing computer and server support, Lab19 can provide personalized and tailored services including:

- * 24/7 System Monitoring
 - keeping an eye that critical servers and services are available as needed
- * Backup Solutions w/ Disaster Recovery
 - ensuring your important company data is secured with easy recovery solutions
- * Network Administration
 - full service management of all your computer systems
- * On-Site and Remote Support
 - troubleshooting and fixing issues in the most efficient way possible
- * Office Setup & Vendor Management
 - setting up phone and internet connections, wall ports, routers, servers, etc
- * Patch Management & Scheduled Maintenance
 - keep systems up to date with software updates/patches and regular reboots
- * Hardware Troubleshooting/Repair/Upgrades
 - replacing a laptop LCD, adding RAM or drive space to a computer system, etc
- * Virus/Malware Removal
 - get rid popups, malware or a virus...and get tools to help prevent their return
- * Active Directory / Email Administration
 - managing users, policies, groups and security
- * Computer & Network Equipment Setup/Configuration
 - smartphones, laptops, desktops, servers, switches, routers, printers, etc
